

The Moorish Republic

Ladies and Gentlemen:

I Am Menes Ankh El, Chief Representative of the Moorish Republic Nation. The Moorish Republic is a Nation composed of the descendants of the formerly enslaved indigenous nations of the North America, and those who were taken from the coasts of Africa during the trans-Atlantic slave trade.

In order for you to understand the basis of the requested topics of discussion, I must give you some true background history of the United States of America as it relates to the so-called “African-Americans”. Much of what is known by the world is based on lies. For over 200 years, our ancestors suffered the most dehumanizing and depraved forms of government sanctioned slavery known to man, which included cannibalism, dismemberment, torture, murder, rape and sodomy of our men, women and children, forced incest and inbreeding. After the end of slavery, they were still being hunted, tortured, and murdered en masse, and with impunity.

In 1868, the USA began deceiving our ancestors into believing that the ratification of the 14th amendment to the USA constitution automatically made them into U.S. citizens with constitutional protections. The fact is that the amendment merely gave our ancestors the opportunity to apply for U.S. citizenship like any other foreign immigrant. This was never advertised, leaving our people in a stateless status and thinking that we were US citizens.

The overwhelming majority of the “black” people of North America still believe that they are U.S. citizens, while all of us still suffer blatant police brutality, institutional racism, wrongful incarceration, mass incarceration, gentrification, mis-education and under-education of our children, systematic dismantling of our communities and family units, the poisoning of our food and water, and suppression of our cultural and economic development.

There is admitted and documented evidence of USA agents planted in our communities to disrupt various political movements of our people. There is also the admitted and documented introduction of narcotics, by agents of USA, into our communities as a counter-measure to our development.

The issues that the Moorish Republic Nation would like to see addressed are as follows:

1. Breaches of the International Covenant on Civil and Political Rights through the United States refusal to recognize our Moorish Republic Nationality and our human right to self-determination.
2. Breaches of the International Covenant on Civil and Political Rights through forced assimilation by way of the US citizen status forced on our people.
3. Breaches of the International Covenant on the Elimination of all Forms of Racial Discrimination through blatant police brutality, institutional racism, wrongful incarceration, mass incarceration, gentrification, mis-education and under-education of our children, systematic dismantling of our communities and family units, the poisoning of our food and water, and suppression of our cultural and economic development.

I look forward to any opportunity to discuss these issues with the Permanent Forum on People of African Descent.

Respectfully submitted,

Menes Ankh El
